

Please cancel Claims 7, 13 and 17-25, without prejudice. Please replace pending Claims 1 and 26 with the following replacement Claims 1 and 26, respectively.

---

1. (Amended) A stretch edge elastic laminate, comprising:

a plurality of elastic filaments substantially aligned in a machine direction, each of the elastic filaments having a width-to-thickness ratio of less than about 2;

A1 a first nonwoven facing material bonded to a first side of the elastic filaments to form an elastic laminate zone; and

at least one stretch edge positioned along a first lateral edge of the elastic laminate, the at least one stretch edge forming a first gasket zone, and including an elastic film or plug having a width-to-thickness ratio greater than about

5.

---

26. (Amended) A disposable garment comprising a stretch edge elastic laminate, the stretch edge elastic laminate comprising:

A2 at least one elastomeric layer including a plurality of elastomeric filaments in a central region of the elastomeric layer, each of the elastomeric filaments having a width-to-thickness ratio of less than about 2 and an elastic film or plug in at
